

Q1 Have you ever migrated an Adhearsion application from one VoIP platform to another?

Answered: 33 Skipped: 0

Q2 If yes, why?

Answered: 7 Skipped: 26

#	Responses	Date
1	because asterisk event subsystem is nightmare	4/27/2013 12:39 AM
2	I recently tried to switch our most recent project from Asterisk to FreeSWITCH but until I get a chance to look at it again, this move remains an experiment that we have yet to deploy into production. Asterisk was not performing adequately and while FreeSWITCH was also less than stellar, it was better. I had actually wanted to use Adhearsion with FreeSWITCH from the start as I had long felt that Asterisk is marred by its legacy but my company preferred to stick to what they knew.	4/19/2013 6:29 PM
3	Asterisk was not delivering the stability we needed and some advanced functionality is flat out impossible.	4/19/2013 11:13 AM
4	Asterisk was making the app unstable but now on Freeswitch features are missing	4/19/2013 5:51 AM
5	Increased usability and maintenance along with getting access to new features like Prism/FreeSwitch support and the centralized configuration changes in Adhearsion 2	4/18/2013 7:37 PM
6	Asterisk was hindering the growth of our platform due to its inherent limitations. We need a more robust development environment and a more engaged community to help us add features to the core telephony engine.	4/18/2013 7:32 PM
7	Performance testing across platforms	4/18/2013 7:29 PM

Q3 Have you ever migrated an application from another solution (eg Asterisk dialplan, VoiceXML, etc) to Adhearsion or vice-versa?

Answered: 33 Skipped: 0

Q4 If yes, what was the migration and why?

Answered: 13 Skipped: 20

#	Responses	Date
1	Dial plan and application logic is much easier to program in AHN than asterisk. And better integration with webserver and database using AHN	4/25/2013 3:33 PM
2	Reduced license fees.	4/23/2013 7:54 PM
3	Asterisk to Ahn and PHP Scripts to Ahn	4/20/2013 11:12 AM
4	On asterisk from Perl-AGI to adhearsion. It was easier to maintain adhearsion code than to maintain old code.	4/20/2013 3:57 AM
5	Our app was on Tropo and it wasn't functioning the way we needed.	4/20/2013 1:57 AM
6	I have not done a straight migration as yet but I anticipate that our recent project will slowly start to inherit features from one of our long-standing core projects based on Asterisk and Perl, and eventually supersede it. The Perl code is poorly structured, massively duplicated, and a total nightmare to maintain. I look forward to getting rid of it. :-)	4/19/2013 6:29 PM
7	Twilio to adhearsion because of our revenue model	4/19/2013 2:21 PM
8	I migrated my first Adhearsion app from the Asterisk dialplan to better manage complexity.	4/19/2013 11:13 AM
9	1) project scope grew too large for the Asterisk Dialplan Language to be easily manageable, so it was migrated to AHN 2) AHN crashed constantly on the customer platform, and so we abandoned it at the beta stage of deployment and used something else.	4/19/2013 10:28 AM
10	From Telegraph to Adhearsion. We need a better solution.	4/19/2013 12:25 AM
11	We've migrated a lot of old Asterisk dialplan applications, and there were two main reasons: 1) Dialplan is convoluted and impossible to read. Everybody knows this but it keeps a lot of people employed. 2) We wanted to get access to much more advanced functionality - lots of database calls, web-interaction, and the whole ecosystem of gems. The amount of functionality provided by the dialplan was insufficient once companies moved behind simple "look this up in a database"	4/18/2013 7:32 PM
12	We had problems with asterisk.	4/18/2013 7:16 PM
13	rewriting old applications to answer new needs	4/18/2013 7:09 PM

Q5 What functions do your applications perform? Select all that apply.

Answered: 28 Skipped: 5

Answer Choices	Responses
Static IVR	50% 14
Dynamic IVR	82.14% 23
Call Queueing	39.29% 11
Individual Outbound Calling (click2call, etc)	64.29% 18
Mass Outbound Calling (Predictive dialling, etc)	35.71% 10
Call screening	39.29% 11
Simple routing (hard-coded rules)	46.43% 13
Dynamic routing (database queries, device status, etc)	75% 21
Screen pops	25% 7
Call recording (monitoring purposes, etc)	64.29% 18
Voicemail	35.71% 10

Q21 What other UI components does your application stack contain? Select all that apply.

Answered: 23 Skipped: 10

Answer Choices	Responses
Web UI (server-side)	95.65% 22
Web UI (client-side, single-page JS, etc)	43.48% 10
Mobile Web UI	17.39% 4
Native mobile app (iOS)	17.39% 4
Native mobile app (Android)	13.04% 3
Native mobile app (Symbian)	0% 0
Native mobile app (Other, please specify)	4.35% 1
Desktop application (Windows)	0% 0
Desktop application (Mac)	4.35% 1
Desktop application (Linux)	8.70% 2
Desktop application (portable)	0% 0

Total Respondents: 23

Q22 What other backend components does your application stack contain? Select all that apply.

Answered: 23 Skipped: 10

Answer Choices	Responses
HTTP web service	82.61% 19
Message queue	39.13% 9
Directory service (LDAP, etc)	8.70% 2
Database	95.65% 22
ASR engine	17.39% 4
TTS engine	47.83% 11
Total Respondents: 23	

Q23 If your application uses a TTS engine, which does it use? Select all that apply.

Answered: 11 Skipped: 22

Answer Choices	Responses
Flite	18.18% 2
Cepstral (via Asterisk app_swift)	45.45% 5
Cepstral (via FreeSWITCH mod_cepstral)	9.09% 1
Lumenvox (via MRCP)	36.36% 4
Nuance (via MRCP)	36.36% 4
Google Translate	36.36% 4

Total Respondents: 11

Other (please specify) (4)

#	Other (please specify)	Date
1	Cepstral, PicoTTS, via own component	4/20/2013 11:26 AM
2	CereVoice	4/19/2013 6:49 PM
3	AT&T & Nuance via chunked HTTP	4/18/2013 7:44 PM

Other (please specify) (2)	

#	Other (please specify)	Date
1	Pocketsphinx via own componet, Google Asr via speech2text gem	4/20/2013 11:26 AM
2	AT&T & Nuance via chunked HTTP	4/18/2013 7:44 PM

Q25 Have you ever run a single Adhearsion application against several different VoIP platforms simultaneously?

Answered: 24 Skipped: 9

Q26 If yes, what platforms were these and why?

Answered: 2 Skipped: 31

#	Responses	Date
1	Because I could.	4/19/2013 11:18 AM
2	Asterisk and FreeSWITCH, mostly to see the performance differences between Adhearsion on both. Keeping multiple platforms running at once would be a pain in the long run.	4/18/2013 7:44 PM

Q27 What is the main business function of the organisation for which you have developed voice applications?

Answered: 20 Skipped: 13

Q28 Please select all the appropriate statements that apply regarding your relationship with Adhearsion:

Answered: 21 Skipped: 12

Answer Choices	Responses
I am an anonymous observer / user of Adhearsion and prefer to stay anonymous.	23.81% 5
I would like to become more active in the community and contribute to this growing platform.	61.90% 13
I think our use of Adhearsion is quite interesting, and I would like for someone to contact me about how we can tell our story to others.	14.29% 3
I need more support in the use of Adhearsion and would like training or more information on support options.	0% 0
Total	21

Q30 Do you have anything else you wish to tell us about Adhearsion?

Answered: 13 Skipped: 20

#	Responses	Date
1	i love AHN	4/27/2013 1:00 AM
2	Adhearsion rocks!	4/26/2013 1:45 AM
3	thank you for a such great project	4/20/2013 4:03 AM
4	I was unable to state earlier that we're seriously considering JRuby. And please don't be so dismissive of ActiveRecord and embedding it within Adhearsion. Whether this can be considered a clean approach or not is quite subjective and I think diligent use of with_connection works well enough for low traffic scenarios. For more intensive situations, I am optimistic that Rails 4 will solve the remaining issues. Please read http://bibwild.wordpress.com/2012/09/21/state-of-activerecord-and-concurrency-another-update .	4/19/2013 6:58 PM
5	Keep up the good work! That includes me.	4/19/2013 11:19 AM
6	Question 28 is "select all" in the text, but the option is a radio button. You might want to fix that.	4/19/2013 10:38 AM
7	keep on rocking	4/19/2013 5:58 AM
8	It rocks	4/19/2013 1:50 AM
9	Awesome!	4/18/2013 10:01 PM
10	<3	4/18/2013 7:45 PM
11	Adhearsion is awesome!	4/18/2013 7:45 PM
12	ahn is the best telephony framework I have ever worked with. Thank you !	4/18/2013 7:19 PM
13	love it! thank you	4/18/2013 7:19 PM
